

# Here's what our Customers *are* Saying

*"I researched a number of offline UV coaters before I found the Kompac Kwik Finish, and I find it to be the best bang for my buck. If you want an offline coater that does more than flood coat, then the Kwik Finish is the obvious choice. There is simply no other machine in its price range that I am aware of that does all the things it does - flood coat, spot coat, UV, Aqueous - and if you're an Indigo owner, you can even sapphire treat your own stock. In my opinion, when it comes to offline coating for digital applications, the Kompac Kwik Finish is a no brainer."*
