

Here's what our Customers *are* Saying

"After years of saying no, we are now saying yes to UV coating with high quality and controlled expense. We can move product from our iGen4 direct to the Kompac Kwik Finish, then right to bindery for finishing. When it comes to variable jobs, the Kwik Finish hasn't missed a beat and we have come off with 100% accountability every time. In our world, getting jobs done right and on-time often means within hours and the Kompac Kwik Finish is a tool we know we can count on."
