

# Here's what our Customers *are* Saying

*“Our Kompac Kwik Finish has added value and capability to Worth Digital, the digital division of Worth Higgins & Associates, Inc. When we looked at other coaters, no other had the ability to quickly spot and flood coat as well as pre-treat substrates. The treatment ability itself has allowed us to capture more short run, fast turn work that would normally have to be printed conventionally due to substrate requirements. Having these capabilities in house allows us to better serve our customers with expanded solutions in the fast paced world of digital printing.”*
