

Kompac®

EZ Koat 20 Plus

- Cost effective, small footprint, sheet-fed flood coating and priming system
- Easily apply UV, aqueous, specialty coatings and primers
- Can be used inline or offline**
- Handles substrates up to 20.5" (520mm) wide by unlimited length (hand-fed)
- Provides coating control and speed adjustment on-the-fly with the color touch screen
- Uses solid state digital UV lamp controller that permits infinite curing and temperature control, saving power and money
- Eliminates the need for re-circulation of the coating – no waste!
- Optional features include: high-pile feeders and stackers (accepts pallets/dollies), in-line conveyors, IR drying, sheet detection (to prevent fires), Anilox coater, and corona treating
- 2-minute coating change (no tanks to clean!)
- Made in the USA

**inline (sheet-fed or web-fed)
and offline (sheet-fed only)

Enhance the look and value of product packaging, labels, catalog covers, product brochures, postcards, business cards, and more using the EZ Koat 20 Plus. This high-powered coating system provides users the ability to apply UV, aqueous, primer & specialty coatings to a wide variety of substrates - including those that are digitally printed.

Suitable for both small and large jobs, the EZ Koat 20 Plus can be used in-line or offline to produce jobs on-demand, using sheets or webs up to 20.5" wide. For users looking to produce higher volumes, the EZ Koat 20 Plus can be placed inline with large format printers to create an automated workflow solution. Using the Kompac conveyor system or in-line web, printed sheets are automatically sent to the EZ Koat 20, where they are flood coated, cured and re-stacked or re-wound.

Kompac Coatings, Primers, & Cleaners

A proper coating can enhance the appearance and durability, increasing the printed product's value. Kompac offers a wide range of finishing options, with a complete line of UV, aqueous, specialty coatings and primers available for all products. Kompac will help you create a visually outstanding finished product!

To keep your Kompac coating equipment operating like the day it was installed, we recommend UV Klean and Aqua Klean as part of your daily UV and aqueous coating clean-up procedure.
